My ideal day starts off with a new patient, followed by complex restorative treatment--ideally something involving a CEREC restoration, and perhaps a few fillings. No filling is _____Adjective - Comparative_____ than a Class II. Anything larger would be a CEREC. A root canal, or implant, or extractions could go here as well. Ending the day is post-op checks, consults, or similar appts. No complex removable. Ideally, only RPD's. Basic TMD cases are interesting. Our practice facility is _____Adjective_____, modern, but not extravagant. Our patients get the sense that we are committed to improving their health, and that we are providing an extremely _____Adjective_____ service to them, but we are not out to simply "take their money."
