STDs

Sexually transmitted diseases (also known as STDs and once called _____Plural noun_____or _____Plural noun_____) are _____Adjective_____diseases that spread from person to person through _____Adjective_____contact. STDs can affect _____Type of person (women, guys, homeless people, etc.)_____and _____Type of person (women, guys, homeless people, etc.)_____of all ages and backgrounds who are _____Verb ending in ing_____ it doesn't matter if they're _____Adjective_____or _____Adjective_____.

Unfortunately, STDs have become common among _____Type of person (women, guys, homeless people, etc.)_____. Because _____type of person (women, guys, homeless people, etc.)_____are more at risk for getting some STDs, it's important to learn what you can do to protect yourself.

STDs are more than just an _____Noun_____. They're a serious health problem. If untreated, some STDs can cause permanent damage, such as _____Disease/condition_____(the inability to have a baby) and even _____Disease/condition_____(in the case of HIV/AIDS).

How STDs Spread

One reason STDs spread is because people think they need to _____Verb_____to become infected. That's wrong. A person can get some STDs, like herpes or genital _____Plural noun_____ through skin-to-skin contact with an infected _____Noun_____or _____Noun_____. Another myth about STDs is that you can't get them if you have _____Adjective_____or _____Adjective_____sex. That's also wrong because the viruses or bacteria that cause STDs can enter the body through tiny cuts or tears in the _____Body part_____and _____Body part_____ as well as the _____Body part (plural)_____.

STDs also spread _____Adverb_____because you can't tell whether someone has an infection. In fact, some people with STDs don't even know that they have them. These people are in danger of passing an infection on to their _____Verb ending in ing_____partners without even realizing it.
