Baby senses

Newborns can feel all different sensations, but respond most enthusiastically to soft stroking, cuddling and

_____ Verb ending in ing _____. Gentle rocking back and forth often calms a crying infant, as do massages and

_____ Adjective _____ Plural noun _____. Newborns may comfort themselves by sucking their thumb, or a

_____ Noun _____. The need to suckle is instinctive and allows newborns to feed.

Newborn infants have unremarkable vision, being able to focus on objects only about 18 inches directly in front

of their face. While this may not be much, it is all that is needed for the infant to look at the mothers eyes.

Generally, a newborn _____ Present tense verb _____ when wanting to feed. When a newborn is not sleeping, or feeding,

or _____ Verb ending in ing _____ he or she may spend a lot of time staring at _____ Adjective _____ Plural noun _____.

Usually anything that is shiny, has sharp contrasting colors, or has complex patterns will catch an infants eye.

However, the newborn has a preference for looking at other human _____ Part of body (plural) _____ above all else.

While still inside the mother, the infant could hear many internal noises, such as the mothers heartbeat, as well as

many external noises including _____ Animal _____ sounds, music and most other sounds. Therefore, although a
newborns

ears may contain some _____ Food (plural) and fluid, he or she can hear sound from before birth. Newborns usually respond to a _____ animal voice over a _____ Animal voice. This may explain why people will unknowingly raise the pitch of their voice when talking to newborns. The sound of other human voices, especially the mothers, can have a calming or soothing effect on the newborn. However, _____ Adjective or _____ Adjective _____ Plural noun will startle and scare a newborn.
