Probability

Probability isused to describe an attitude of mind towards someof whose truth
we are not certain.[1] The proposition of interest isof the form "Will a specific event occur?";
The attitude ofis of the form "Howare we that the event will occur?"; The
certainty wecan be described in terms of a numericaland this number, between 0
and 1, weprobability.[2] Thethe probability of an event, the more certain we are
that the event will occur. Thus, probability in an applied sense is a measure of the likeliness that a
event will occur.
The concept has beenan axiomatic mathematical derivation in probability theory, which is
usedin such areas of study as mathematics, finance, gambling,Noun
artificial intelligence/machine learning andto, for example, draw inferences about the likeliness of
events. Probability isto describe the underlying mechanics and regularities of
Adjective systems.
