# The Lungs

How does oxygen get into the \_\_\_\_\_  
Noun? When we \_\_\_\_\_  
Adjective or inhale air through our  
\_\_\_\_\_  
Noun or nose it \_\_\_\_\_  
Verb down a long \_\_\_\_\_  
Noun in the throat called the trachea. Once inside  
the \_\_\_\_\_  
Location the trachea divides into \_\_\_\_\_  
Number tubes called the bronchial tubes. Inside the lungs the  
tubes divide like the branches of a \_\_\_\_\_  
Noun. Here is where \_\_\_\_\_  
Noun cells pick up their supply of  
oxygen and drop off carbon dioxide waste, which the \_\_\_\_\_  
Noun will not use.
