The Lungs

How does oxygen get into the _____^{Noun}? When we _____^{Adjective} or inhale air through our
_____^{Noun} or nose it _____^{Verb} down a long _____^{Noun} in the throat called the trachea. Once inside
the _____^{Location} the trachea divides into _____^{Number} tubes called the bronchial tubes. Inside the lungs the
tubes divide like the branches of a _____^{Noun}. Here is where _____^{Noun} cells pick up their supply of
oxygen and drop off carbon dioxide waste, which the _____^{Noun} will not use.
