# That one day in bio lab...

One day in Biology Lab, we had to make phylogenies and then write classifications for them. We had to use

\_\_\_\_\_ from the planet, Hardwaria. We were so \_\_\_\_\_ with the lab, especially after having to

turn in a paper. We really wanted to make the paper \_\_\_\_\_ using trinitrotoluene from the \_\_\_\_\_

chemistry lab, but we had to \_\_\_\_\_ until we got the paper back. Back to our \_\_\_\_\_

we started to discuss natural selection. We decided that it always resulted in \_\_\_\_\_ babies, and more

\_\_\_\_\_. We then made a claim that God created the \_\_\_\_\_ and Linnaeus organized those

\_\_\_\_\_ to give us nightmares from having to do this lab based on his organizational methods. We saw

something in the room, it was a \_\_\_\_\_ of death, it was so spiky! Next we saw a \_\_\_\_\_ no

wait, its a raccoon! Our professor then proceeds to tell us that we may have a dinosaur tooth in our

\_\_\_\_\_ which scared us, but then she explained the carbon cycle. We then left class \_\_\_\_\_

\_\_\_\_\_ M-I-C-K-E-Y M-O-U-S-E, Mickey mouse!
