Avalanches!

An _____^{Noun} is a large mass of snow that goes at a very _____^{Adjective} speed down a slope or mountain slide. It is often fatal, and causes over _____^{Noun} deaths annually, and the deaths _____^{Verb} every year. It is also referred as a powder cloud or a big powder of snow. There are _____^{Noun} main types of avalanche: a dry snow avalanche, a wet snow avalanche, and a slab avalanche. Most avalanches occur because the _____^{Noun} conditions make the snow on a mountain or slope uneasy, causing it to fall, then creating a _____^{Adverb} avalanche.
