# Automated spacecraft resupplies International Space Station

The European Space Agency's Automated Transfer Vehicle-3 (ATV-3) recently docked with the International Space Station (ISS) on a \_\_\_\_\_ mission.

Flight Engineers Andre Kuipers and Oleg Kononenko monitored the 13-ton ATV-3's approach in conjunction with \_\_\_\_\_ controllers stationed in \_\_\_\_\_.

Automated spacecraft resupplies International Space Station unmanned craft - named \_\_\_\_\_ after the 20th century physicist - delivered 220 pounds of \_\_\_\_\_, 628 pounds of \_\_\_\_\_, 45 tons of \_\_\_\_\_ and nearly 25 tons of \_\_\_\_\_ to astronauts on board the station.

Among other items, the crew also received experiment hardware, spare \_\_\_\_\_, food and \_\_\_\_\_.

The ATV-3 is slated to remain docked with the space station until September, when it will be loaded with \_\_\_\_\_ and sent to burn up as it re-enters the Earth's atmosphere over the Pacific Ocean.
