Pregnancy symptoms: 4 signs you might be pregnant

4. Heightened sensitivity to _____ Noun - Plural _____

If you're newly pregnant, it's not uncommon to feel repelled by the smell of a _____ Animal _____ sandwich or a cup

_____ of Repeat Last Noun - Plural _____, and for certain aromas to trigger your gag reflex. Though no one knows for sure, this

may be a side effect of rapidly increasing amounts of _____ Noun - Plural _____ in your _____ Part of Body _____. You may

also find that certain foods you used to enjoy are suddenly completely repulsive to you.

3. _____ Verb - Present ends in ING _____

Feeling tired all of a sudden? No, make that exhausted. No one knows for sure what causes early pregnancy

_____, but it's possible that rapidly increasing levels of the hormone progesterone are

contributing . (Of course, morning sickness and having to _____ Verb - Base Form _____ frequently during the night

can add to it , too.)

2. A missed period

If you're usually pretty regular and your period doesn't arrive on time, you may decide to do a pregnancy test

before you notice any of the above symptoms. But if you're not regular or you're not keeping track of your

_____, _____, _____ and Repeat Last Part of Body _____ tenderness and extra trips

to the bathroom may signal pregnancy before you realize you didn't get your period.

1.

A positive home pregnancy test

In spite of what you might read on the box, many home pregnancy tests are not sensitive enough to reliably detect pregnancy until about _____ weeks after a missed period. So if you decide to take a test earlier than that and get a negative result, try again in _____ days.

Once you've gotten a positive result, make an appointment in _____ " !
