Winterize your Boat

1. According to the instructions on the bottle, pour the correct amount of _____Adjective_____Plural noun_____into the boat gas tank.

2. Have antifreeze handy and open the _____Noun_____intake on your boat that allows you to connect an external _____Adjective_____Noun_____.

3. Start the boat motor and pour 1/2 gallon the of the antifreeze into the water intake. This will clear out any _____Plural noun_____that may be left in the motor from your last use, and will also allow the fuel stabilizer to _____Verb_____Plural noun_____in the gas tank.

4. Stop the boat motor.

5. Use the remaining antifreeze to pour liberally throughout the engine compartment and any other areas of the boat that may have water in them and be at risk of cracking from frozen _____Noun_____expansion.

6. Remove the _____Adjective_____wires from the battery terminals, then remove the battery from the boat.

7. Place the battery in a heated area such as your _____Adjective_____Noun_____for the winter.

8. Remove all spark plug/ignition wires from the spark plugs, then remove all _____Noun_____plugs from the engine cylinders.

9. Place 1 or _____Number_____drops of oil into the cylinders through the spark plug holes. From what I hear, this can actually prevent small amounts of oxidation by allowing the oil to collect _____Plural noun_____that may develop in the cylinders.

10. Put the spark plugs back in the cylinders, but _____Verb_____the _____Adjective_____Plural noun_____.
