# Toast or nothing.

\_\_\_\_\_ is bread that has been \_\_\_\_\_ by exposure to \_\_\_\_\_.  
\_\_\_\_\_. This \_\_\_\_\_ is the result of a \_\_\_\_\_ reaction. Toasting warms the bread and makes it firmer, so it holds \_\_\_\_\_ more securely. Toasting is a common method of making \_\_\_\_\_ bread more \_\_\_\_\_. In a \_\_\_\_\_ kitchen, the \_\_\_\_\_ method of toasting bread is by the use of a \_\_\_\_\_, an \_\_\_\_\_ appliance made for that purpose. To \_\_\_\_\_ a modern toaster, \_\_\_\_\_ bread is \_\_\_\_\_ into the \_\_\_\_\_ slots on the top of the toaster, the toaster is \_\_\_\_\_ to the \_\_\_\_\_ setting (some may have more elaborate settings than others) and a lever on the front is \_\_\_\_\_ down. The toast is \_\_\_\_\_ when the lever pops up along with the toast. If the bread is \_\_\_\_\_ toasted, the lever can be \_\_\_\_\_ down again. One of the \_\_\_\_\_ home toasting appliances that was available would only toast one side of the bread at a time, so the bread had to be \_\_\_\_\_ over half way through.
