Ros' tips for Seagrass planting

Renowned uw gardener Rosaline Crosse, has (Adjective) tips for the (Adjective) beginner. She has (number) years of experience under her belt and would be (emotion) to share her (Adjective) knowledge with you.

First, the ideal plants to start with are (color) (Adjective) seagrass. You should plant them (number) inches apart and (number) (unit of measure) into the soil. The ideal soil should be (Adjective) and (adjective). If the soil conditions are not perfect, the seagrass may (Verb - Base Form), which is not good.

Once you have (Adverb) planted your Seagrass, you need to watch out for (Adjective) (color) (insect - plural). These will cause the Seagrass to grow (Noun) as well as cause them to (Verb - Base Form). If these varmints invade, it will take (number) (unit of time) for the (Adjective) problem to correct itself.

If you (Adverb) care for your Seagrass, you will get years of (Adjective) enjoyment out of it.

Seagrass also make great gifts for (Holiday) or (proper noun Noun). It may take you a few (unit of time - plural) and a lot of (Adjective) work, but you will (Adverb) get the hang of it.

Any (Adjective) questions please contact Rosaline and she will get back to you at her (Adjective) convenience.
