# SOAP

HISTORY OF PRESENT ILLNESS: Ms. \_\_\_\_\_ Proper Noun is a \_\_\_\_\_ Noun with past medical history that includes a \_\_\_\_\_ Part of Body cyst. This was apparently removed when she was \_\_\_\_\_ Number. Last July she presented with more pain in \_\_\_\_\_ Part of Body area. On exam, it was apparently unclear if there was a recurrence. She was put on a course of \_\_\_\_\_ drug and \_\_\_\_\_ Noun resolved. She presents to walk-in today saying that same thing has happened. She has had a \_\_\_\_\_ Number days of increased swelling in this \_\_\_\_\_ Part of Body. No \_\_\_\_\_ symptom. \_\_\_\_\_ Adjective pain. Bowel movements are \_\_\_\_\_ Adjective.

PHYSICAL EXAMINATION: BP \_\_\_\_\_ Number/74, pulse \_\_\_\_\_ Number. She is afebrile. We had a \_\_\_\_\_ Adjective nurse chaperone in the room during the \_\_\_\_\_ Noun. In the upper aspect of her \_\_\_\_\_ Part of Body cleft there were \_\_\_\_\_ Number scars from her prior \_\_\_\_\_ Noun. This area was \_\_\_\_\_ Adjective indurated. There was absolutely no \_\_\_\_\_ color or \_\_\_\_\_ skin exam finding and it was not tender at all. No \_\_\_\_\_ skin exam finding.

ASSESSMENT AND PLAN: Possible recurrence of \_\_\_\_\_ Part of Body cyst. We do not see any \_\_\_\_\_ Adjective evidence of an \_\_\_\_\_ Noun, but given her apparent \_\_\_\_\_ Noun last July, we will give her another \_\_\_\_\_ Number course of \_\_\_\_\_ drug. She will return to \_\_\_\_\_ Noun if things do not \_\_\_\_\_ Verb or if they get \_\_\_\_\_ Adverb - Comparative.
