How to kill a plant

You will need:
1 potted plant
1 cup of bleach
1 up ray light
1 trashbag
1 new plant
Don't you just hate that neighbors plant in their front window? You ask your self how do I
dispose of that horrid disgrace to nature, then they coincidently ask you to "plant sit" while Pronoun are
on vacation. They want you to feed their <u>Noun</u> , make sure the doors are locked <u>Conjunction</u> lastly
, their plants. Now is your time to kill that ugly plant! no! You have no
idea how you are to kill this disgrace (Preposition come on you have to make it interesting, its you first
time verb - Present ends in ING a plant) and that precisely is why am here! This is how to kill
a plant! First, all plants need sun right? this is were you should use the UV ray light to give it
some

sun. You should hang the light the plant to make sure that the plant gets some sun. Leave the
plant under the light for 1 hour and then start the second step leaving the plant under the
ligtht you need to water the plant, since you are killing the plant you shouldn't water it with
water, but the bleach. Now, the last step is to put this demolished in that trashbag you have
brought and throw it away at home. Make sure that all eviance is gone before they arrive home,
or they will be suspicious. Now, when the neighbors arrive home, make sure to give them a new pretty plant to
replace the ugly one by telling them that their cat got to it! If the neigboors dont have a cat
try and find another excuse to cover up what really happened. Now, you can finally admire the lovely plant in
their window!
