Regression Analysis Memories

My first memory of regression analysis was _____ Number years ago, when I took Introduction to Statistics.

That class was _____ Adjective! I had a _____ Adjective professor, named _____ Famous person. I remember

_____ Regression Thought and _____ Regression Thought. That year I got a pet, _____ Animal. So I was very

concerned with _____ Verb - Present ends in ING my _____ Animal. Instead of studying I was always

_____ Something you did in college. I ended up needing to cram before every exam and always drank 5 pots of

_____ Drink. I spent an all nighter at _____ Place on campus! I ended up doing fine in that class, but could

never remember how to calculate _____ Regression Thought and _____ Regression Thought. Now I know that

regression analysis makes up the basis of a number of statistical methods. I may even use regressions for my

work with _____ A community group you are working with.
