# Io: A Fiiine Lady

Zeus, the king of the \_\_\_\_\_ Noun - Plural, was feeling a little lonely. He would have hung out with with his wife Hera, but she was scary dawg. So he went down to the earth and started crusin' for some ladies. He had the best pick-up line too: "I'm Zeus."

He was walkin' along and all of a sudden, he saw this fine Lady. She was coolin' off by da pool, and he felt like gettin' some o' dat. He didn't want his wife to see, so he covered the sky with dark clouds to keep his wife from seeing him him with the now named Io. This made his wife suspicious, and she cleared the clouds away. Quickly thinking, Zeus changed Io into a cow. His wife asked to have it as a present, and knowing that it would be suspicious to refuse, he said yes.

Not willing to look after the fiiine cow (she lazy, bro) she sent Argus to do it for her.

Zeus felt sorry for her, and sent his son-guy Hermes to go save her. Argus had 1,000 eyes, so when some slept, others were awake. He was watching. Argus was always watching.

After several hours of work, he was finally able to get Argus to close all of his eyes, and save Io. Hera was upset, and sent the mother of all gadflies to sting her forever. She went many places along the way. Zeus eventually stepped in and turned her back into a naiad, but the memories of being a cow stuck with her forever eggs milk bread.
