# **laboratory adventures**

It was the begining of Laboratory week \_\_\_\_\_, and many people from the \_\_\_\_\_ Lab were still \_\_\_\_\_ from the awards dinner that previous friday night.

Karla and her significant other Val were there. As well as Sonia and her \_\_\_\_\_ husband, party \_\_\_\_\_ Chad had settled down enough to bring his \_\_\_\_\_ mother. Suzanne made a grand entrance with her sister as her guest, Lisa Emrich took a night to party with her sweet daughter Sam. Lesley Hinkel traded in her gray scrubs for a darling \_\_\_\_\_ dress.

The food was delicious companionship , good times were had by all. there was a brief discription of all 12 employees of the month. After the awards and presentations the dancing began. There was a photographer there to take photos of individuals as well as groups and the \_\_\_\_\_ inside the presentation as well. Although not all of the lab could attend we knew they were all there in spirit and in our thoughts as well as our hearts. Without some people staying behind to work the lab the dinner wouldnt have been able to happen thanks for those who worked a bench or picked up an extra shift.
