# You and Your STDs

\_\_\_\_\_ Boy in the Room \_\_\_\_\_ and \_\_\_\_\_ Girl in the Room \_\_\_\_\_ are in 8th grade. They both know the general sex education, but want to know more. They have friends that joke about getting STDs. Do you know what STDs are? NOOO?

Well let me tell you about STDs. You get them from \_\_\_\_\_ Noun \_\_\_\_\_ to \_\_\_\_\_ Noun \_\_\_\_\_ contact, bodily fluids (not spit), and sometimes by having babies. \_\_\_\_\_ Boy in the Room \_\_\_\_\_ gets a bacterial STD. Bacterial STDs can be cured!

Good for \_\_\_\_\_ Boy in the Room \_\_\_\_\_!! He may have any of the following; Chlamydia, Gonorrhea and Syphilis. Let's eliminate our competition. \_\_\_\_\_ Boy in the Room \_\_\_\_\_ has the following symptoms: unusual discharge from his male sex organ and pain \_\_\_\_\_ technical word \_\_\_\_\_. His testicles are swollen. If he had syphilis he would have a

\_\_\_\_\_ symptom \_\_\_\_\_, and Chlamydia doesn't make your testicles swell. So the winner is \_\_\_\_\_ Insert STD \_\_\_\_\_!!!!

Maybe that's not something to be laughing about? Leeroy should treat this soon. Gonorrhea can cause infertility without ever showing symptoms. It can also spread to the blood and joints. He'll just need to take some antibiotics and make sure to think before his actions. \_\_\_\_\_ Girl in the Room \_\_\_\_\_ doesn't know what she has. Possible candidates are: Herpes, Hepatitis B, and HIV. She feels \_\_\_\_\_ Adjective \_\_\_\_\_. She knows that Hepatitis B comes with flu-like symptoms and really dark pee. She has normal colored pee, but seems to be getting sick more and more. There are no \_\_\_\_\_ symptom \_\_\_\_\_ on her body so it's not Herpes. After a blood test, the doctor informs her that she is positive for HIV, but tells her to visit again in \_\_\_\_\_ number \_\_\_\_\_ months just to make sure there are no false positives.

Now these two friends go on mission to teach their laughing friends how not to be them! Their friend Lawrence is abstinent. They respect his decision because \_\_\_\_\_ number \_\_\_\_\_% effective against getting STDs. \_\_\_\_\_ Girl in the Room \_\_\_\_\_ and \_\_\_\_\_ Boy in the Room \_\_\_\_\_ want to inform the others that there are ways beyond abstinence. Like \_\_\_\_\_ contraceptive \_\_\_\_\_! Condoms, if used correctly, can prevent about 90% of the chances of getting an STD. 95% of condom brands protect against them. USE THEM CORRECTLY! The only vaccine available is for Human Papilloma Virus. "All STDs are highly contagious if not correctly prevented"(Mr.DeLucia).

Six Months Later... Sally went back to the doctors and she indeed has \_\_\_\_\_ Insert STD \_\_\_\_\_!!!!!!!!!!!!!! Human Immunodeficiency Virus. VIRAL INFECETION. It can never! Ever! Ever! Go away! But you can take medicine to keep it under control. Don't be like \_\_\_\_\_ Girl in the Room \_\_\_\_\_ or \_\_\_\_\_ Boy in the Room \_\_\_\_\_. Prevent yourselves a lifetime of shame and pain, don't be \_\_\_\_\_ Adjective \_\_\_\_\_ wrap your willy and be smart.
