Cold war

During World war II the United states made a Adjective Noun. they drop this Same
Noun as first sentence on Noun. They surrendered after the united states dropped the Same Noun as
first sentence on them. Then the soviet union wanted to get a Same Noun as first sentence like the United states
. They start to make the Same Noun as first sentence and the united states doesn't like that because the soviet
union is Noun. The United states wants to Verb them but they can't. Now that soviet union
threatens the United states by saying they will Verb them up. The united states says if they do they will
return a Same Noun as first sentence back at them. This is the start of the Adjective war
