## Charles' Law

Once upon a time, there was a man named Charles who did an experiment with
Noun - Plural . He learned that different gasses of the same Noun at the same heat, grow
uniformly. This proves that <u>Noun</u> and <u>Noun</u> have a <u>Adverb</u> proportional
This means that when one goes up, the other goes down. The one thing that never changes in this
equation is the This law also verb - 3rd Person Singular Present why bread rises in the oven, and
why lung capacity reduces when they the weather is
