Physical and Cultural Geo

World Geography is easy to explain, so pay close attention. First of all, there's two main types of geography: physical and cultural. When studying physical geography geographers study things such as the 4 different levels of the earth: the _____Noun_____, _____Noun_____, _____Noun_____ and _____Noun_____. Do you know which one you live in? Some people say that the earth is getting hotter. Apparently all of our pollution is making the mercury rise on the thermometer. Have you heard of this occurrence? It's called _____Noun_____ _____Noun_____ and some folks say it's resulting in some major _____Noun_____ change. If you want to know about cultural geography you'll need to study things like _____Noun_____ and _____Noun_____. This year, you'll learn a lot about _____Noun_____ _____Noun_____ all around the world. And that's geography in a nutshell!!
