Hydraulic fracturing, or fracking, is the process of rock apart with high-pressure water
to release the natural gases trapped underneath. Its purpose is to present the with an
fuel source. Companies who using fracking techniques claim that the practice is safe. But is in
really safe? They will not their secrets, so who can know? If i
hurts their competitiveness, then they will keep their secrets. Energy companies who claim that fracking is safe
will say to appease the public if it means making more
