Incremental development is particularly useful when staffing is unavailable for a

complete implementation by the business deadline that has been established for the

project. Early increments can be implemented with fewer people. If the core product

is well received, then additional staff (if required) can be added to implement the next

increment. In addition, increments can be planned to manage technical risks. For example, a major system might

require the availability of new hardware that is under

development and whose delivery date is uncertain. It _____Modal_____ be possible to plan early

increments in a way that avoids the use of this hardware, thereby enabling partial

functionality to be delivered to end users without inordinate delay.
