# body issues

I woke up this morning with a           Noun           on my           Noun          . So then I tried to           Verb           it but then it got           Adverb - Comparative          . I went to see a           Noun           but           Pronoun           said there wasn't anything to do about it. SO I went home to my girlfriend and she           Verb - Past Tense           me. So now I know that           Noun           isn't fun with body issues.
