

# Big Bang

1. Noun
2. Number
3. Determiner

# Big Bang

Our whole Noun was in a hot dense state,

Then nearly Number billion years ago expansion started. Wait...

The Earth began to cool,

The autotrophs began to drool,

Neanderthals developed tools,

We built a Determiner (we built the pyramids),

Math, science, history, unraveling the mysteries,

That all started with the big bang!

"Since the dawn of man" is really not that long,

As every galaxy was formed in less time than it takes to sing this song.

A fraction of a second and the elements were made.

The bipeds stood up straight,

The dinosaurs all met their fate,

They tried to leap but they were late

And they all died (they froze their asses off)

The oceans and Pangea

See ya wouldn't wanna be ya

Set

in motion by the same big bang!

It all started with the big BANG!

It's expanding ever outward but one day

It will pause and start to go the other way,

Collapsing ever inward, we won't be here, it won't be heard

Our best and brightest figure that it'll make an even bigger bang!

Australopithecus would really have been sick of us

Debating how we're here, they're catching deer (we're catching viruses)

Religion or astronomy (Descartes or Deuteronomy)

It all started with the big bang!

Music and mythology, Einstein and astrology

It all started with the big bang!

It all started with the big BANG!
