Worksheet

1. _____ weight 250 pounds and uses a spring to jump to _____. In an attempt to to
_____, the spring is compressed 15 inches from its original length of 25 inches. However,
_____ loses a _____ along the way, but grabs a _____, keeping
its weight the same. Magically, the spring is compressed another 5 inches. From 10 to 5 inches, the spring is
compressed with _____ inch-pounds.
