# Worksheet

1. \_\_\_\_\_ weight 250 pounds and uses a spring to jump to \_\_\_\_\_. In an attempt to to  
\_\_\_\_\_, the spring is compressed 15 inches from its original length of 25 inches. However,  
\_\_\_\_\_ loses a \_\_\_\_\_ along the way, but grabs a \_\_\_\_\_, keeping  
its weight the same. Magically, the spring is compressed another 5 inches. From 10 to 5 inches, the spring is  
compressed with \_\_\_\_\_ inch-pounds.
