Worksheet

1. _____^{Noun} weight 250 pounds and uses a spring to jump to _____^{Place}. In an attempt to to
_____^{Verb}, the spring is compressed 15 inches from its original length of 25 inches. However,
_____^{Noun} loses a _____^{Part of Body} along the way, but grabs a _____^{Adjective} _____^{Noun}, keeping
its weight the same. Magically, the spring is compressed another 5 inches. From 10 to 5 inches, the spring is
compressed with _____^{Work} inch-pounds.
