Einstein

A human being is a part of the whole called by us universe, a part limited in time and space. He experiences himself, his Noun - Plural and Noun as something separated from the rest, a kind of optical delusion of his consciousness. This delusion is a kind of Noun for us, restricting us to our personal desires and to affection for a few persons nearest to us. Our task must be to Verb - Base Form ourselves from this prison by widening our circle of compassion to embrace all Verb - Present Tense creatures and the whole of nature in its Adjective ending in -ness.
