The story of our software

In the beginning Schlumberger had no Noun . But it saw Adjective Noun everywhere, and it wanted some of its own. So it bought some Adjective Noun . It was nice, but it didn't do everything Schlumberger wanted. So it bought even Adjective - Comparative Noun , like Proper Noun and Proper Noun . But now Schlumberger had a Noun . All the software didn't Verb - Past Participle together, and Noun - Plural were Adjective . Also, the Noun was getting old. People Verb - Past Tense when they used it. Something had to be done. So, Schlumberger held an Noun Noun . Everyone brought their Adjective - Superlative Noun - Plural and put them in the Noun . Now Noun - Plural were Adjective , and Verb - Past Tense more Noun . And Schlumberger was Adjective too, because now everyone knew they were the most Adjective Noun in the Noun .
