13. Noun - Plural _____

Security

Hi I'm _____ from COMPUTICA, taking care of your _____, _____, _____ and _____. Today I'd like to talk about security. Ever since the Internet was invented by _____, passwords have been a necessity. Today it's very important to have _____ passwords and change passwords as often as you change your _____. You've heard me talk about ransomware last week and how it now encrypts the filenames so you can't even tell what the names of the files are that were encrypted. Well, the hackers have upped it one more level. NOW they are downloading your data and threatening to sell it on the open market. So prevention is even more important now than it ever was. I'm _____ from COMPUTICA, taking care of your _____, _____, _____, _____ and _____.
