2.	Proper Noun
3.	Adjective
4.	Adjective
5.	Noun

lingering

Over the course of this data	Noun	, I noticed that	Proper Noun	Adjective	need within
reading is her pronunciation of	verb tense	es. She would often	omit or add the "-e	d" to a variet	y of verbs within
her read-alouds'. I was able to	work on th	nis with her using a	strategy where she	identified a v	ariety of verb tenses
and in what sentences they app	olied, howe	ever I was not able t	o assess how this n	niscue affecte	d her
comprehension. Within her ret	elling, she	did not use a logica	l, <u>Adjective</u>	order and of	ten mixed up if
events were past	or presei	nt. I am not sure who	ether to attribute th	is to her nerv	es or if I should
work with her further on seque	nce charts	and their connectio	n to verb tense with	hin a specific	text. This is
important to the data collection	n because i	t is not only a repea	ted miscue, but cou	ıld possibly b	e affecting her
overall comprehension.
