# Sharks! part 1

\_\_\_\_\_ part of speech: word: sun is shining down on the ocean. The \_\_\_\_\_ part of speech: word: is clear and  
\_\_\_\_\_ part of speech: word:. Under the surface, schools of fish \_\_\_\_\_ part of speech: word:. But another animal  
\_\_\_\_\_ part of speech: word: along with them. It has a long, \_\_\_\_\_ part of speech: word: body and very sharp  
\_\_\_\_\_ part of speech: word:. It is looking for something to eat. \_\_\_\_\_ part of speech: word: all over the world fear this  
\_\_\_\_\_ part of speech: word:. It's a shark!

Sharks are part of the same animal \_\_\_\_\_ part of speech: word: as fish. They have a \_\_\_\_\_ part of speech: word:,  
\_\_\_\_\_ part of speech: word: body and a powerful \_\_\_\_\_ part of speech: word:. Sharks have fins on the sides and top of  
their body. Their fins help them \_\_\_\_\_ part of speech: word: direction as they \_\_\_\_\_ part of speech: word:. Sharks also  
have thin \_\_\_\_\_ part of speech: word: on the sides of their head. These gills are used for \_\_\_\_\_ part of speech: word:. A  
shark's skin is very rough. People say it \_\_\_\_\_ part of speech: word: like sandpaper. But it is really made up of  
\_\_\_\_\_ part of speech: word: scales. The scales look a lot like the ones on a snake.

Most sharks have dozens of sharp \_\_\_\_\_ part of speech: word:. Their teeth help them hold on to slippery  
\_\_\_\_\_ part of speech: word:. If a tooth \_\_\_\_\_ part of speech: word: or falls out, another one \_\_\_\_\_ part of speech: word: in  
its place. Not all \_\_\_\_\_ part of speech: word: have teeth, though. Some have mouths that are \_\_\_\_\_ part of speech:  
word: with \_\_\_\_\_ part of speech: word: filters. These sharks \_\_\_\_\_ part of speech: word: their food by  
\_\_\_\_\_ part of speech: word: up their mouths as they swim. \_\_\_\_\_ part of speech: word: animals called plankton get  
washed in. Then the filters trap the plankton for the sharks to \_\_\_\_\_ part of speech: word:.
