Abstract

This analyzes the of the irrigation, or outdoor water-use, flux in Los Angeles, CA
on land surface temperatures and the hydrologic of the area. We focus on Ballona Creek
watershed, a urbanized region of Los Angeles, which provides a range of
urbanization type-high density downtown, residential areas, mid-rise, parks, campuses etcwith
irrigation volumes throughout. Utilizing remotely sensed products, water use
data, and over Number Noun - Plural with a Verb - Past Participle land surface-hydrologic
model we find impacts on both land surface temperatures and the hydrologic Noun -
Plural of the domain.
