Finding my Career

Ever since I was 5 years old, I've wanted to become a career choice. My mom is a career choice and my older brother is going to medical school. One day, my mom took me to the Noun where she works and I got to talk to Noun there and they told me their daily routine. The Noun let me take someone's temperature and enter information in the computer. I can't wait to go to college and finally be able to become a doctor!
