Test

Nothing makes me happier than when a friend of mine starts bragging about their new 75" TV. It gives me the opportunity to use one of my favorite TV-size humbling lines -- "oh, you measure in inches?"

That's right, with _____ Noun Plural we measure in feet! I've got a 10.5 ft. screen at home and the corresponding projector cost me a lot less than a 75" TV would have.

But then a couple years go by and one day you notice that the projector starts "turning off" after a few minutes.

A likely symptom of a dying projector lamp.
