Pelle Tessuta

"This is the ______ companion you will ever travel with. In Zegna we have a ritual where new designers visit our wool mill, started over a century ago. There was a leather expert who was <u>Adjective</u> by every aspect of the factory production. He was by all means a fabric ______. After he visited the mill he became ______ with the process of how we make the Adjective fabrics in the world. He had one of those Adjective ideas that seem impossible to achieve. But he was Adverb _____ sure. He loved the wool working process. He wanted to do it in leather. He tried to put thick strands on the loom but it didn't work, and only made it to stop. So he worked on extremely thin leather strands. They were so <u>Adjective</u> they often broke even before starting the loom. But from there, he started adding thickness, until he reached the perfect dimensions. Sturdy, but thin enough for the loom. 2.2 mm strands: the perfect balance.

and ______, Pelle Tessuta was born."
