Guitar player

Once there was a Animal who played Instrument. He played it like a Noun and knew a ton of Noun Plural like Noun Plural of the Location. After playing with his Noun one day, he decided to create a band. They called it Name of a band. They played at the Location and were an instant success. One Yelp review stated Review - cool product I loved it etc. They then went on to play throughout Country and had a fun time doing so.

The End.
