Fallout English project

In west Halifaxia born and raised, on the is where i spend most of my days, out kicking and
blocking feeling all cool under some shoulder pads is what i'll be in until some fool his arm
now the left is where he'll be found. was getting mentally bullied and had to transfer wastelands
there he sat in the ground all day staring and wasting sad life away. Made a choice to start
walking through the fallout going down the dusty street past the radiated trees. I was looking for loot near old
busted houses that collapsed in the explosion. I found a of a cat in a toilet first time I ever
saw that my biggest prize I found was a whole bottle of Coca Cola which I'm saving to hopefully get it cold. I
also found some flex tape and scrap of metal I can use to put on my boat. I finish my trek back
to my boat to which has become my new home. I could live in the next to it but
to noticeable so in the boat I stay, the food is always low and water isn't too bad once I
it. I'm still looking for a working rifle for 3 boxes of .38 caliber bullets that aren't
completely rusted over, with hollow point tips, but I will settle for brass and led tips. What's that? I feel like
someone is watching "I come in peace!!!!" who are you I ask. I am Bryce (shows Spock
symbol) instantly became best friends. We now need to obtain double the food but it's nice to have someone
watching our backs. On a run into town, we into a girl we never have seen before we grab
our guns. Before I can act Bryce pulled the trigger without hesitation and her. We stealthily
and slowly come closer to carcass to find a tag on her chest I pull it closer to see what it reads it
says Mrs, "click" a grenade was attached to the tag, we quickly turn and almost clear the blast
hut

boom!!! the grenade blast Adjective Ends in EST b	both me and Bryo	ce. The end of time.
