The History of Cryptocurrency

| There have been many attempts at creating a digital currency during the 90s tech boom, with systems like Flooz |
|--|
| Proper Noun and DigiCash emerging on the market but inevitably failing. There were many different |
| reasons for their failures, such as |
| employees and their |
| |
| Notably, all of those systems utilized a Trusted Third Party approach, meaning that the companies behind them |
| and verb Past Tense the transactions. Due to the failures of these companies, the |
| creation of a digital cash system was seen as aAdjective for a long while. |
| Then, in early 2009, a programmer or a group of programmers under an alias Satoshi |
| Nakamoto introduced Bitcoin. Satoshi described it as a Adverb cash system. It is |
| completely decentralized, meaning there are no Animal - Plural involved and no central controlling |
| authority. The concept closely resembles peer-to-peer networks for sharing. |
