Use Strong Passwords

Password Security

Not all passwords are the same. Some are while others are We want to make								
secure ones. For starters, don't use your name, your pet 's name, or the name of your favorite								
professionalteam. Secure passwords shouldn't be connected to you, so save that self-expression								
for your creative								
take a scientist or brain to create a strong password. Here's one trick for								
password making that you can share with your friends and family at your Cook Out.								
Take four random letters. For example, L N O R.								
Now make a short phrase with words that begin with those letters.								
Word Starting with L Word Starting with N Word Starting with O Word Starting with R								
Use those four words as a passphrase, a password but longer and more secure. It's so simple and easy, even your								
cranky will thank you. There's just one catch. You need unique passwords for every								
account.								

Did you know	v the average perso	n has over	Number	_ internet accou	ints? Whether it	's aAdjective
name like An	nazon, a specialty _	Noun	_ store, or a s	ervice that strea	ms Adjective	films from
Country	, they all require	an account.	Some people	just use the san	ne password and	d write it down on a
Noun	_ they hide under t	heir keyboard	l. A password	l manager can c	reate and remer	mber the passwords for
you.						
Passphrases a	and password mana	gers take the	worry out of	passwords, so y	ou can focus yo	our mind on
Verb Present	t ends in ING the t	rain or that ni	ice Noun	you'll be c	cooking when y	ou get home after work
Use Strong Pa	asswords: Create lo	ong, unique pa	asswords. Ke	ep track of then	n with a passwo	ord manager. Protect
them with two	o step verification.
