All Drains Lead to the Ocean

Local news report transcript.

News Anchor: Now to our next story. A young man is on the road to recovery after a close shave on a holiday retreat, which left him hospitalised. Name you would give to your cat Type of fish reports.

Reporter: At a suburban home on the outskirts of Country, Male celebrity was just your average Profession - eg doctor or farmer. With the holiday season approaching, he, like many others, had planned a trip away from his home town. Little did he know, a short holiday, would change his life forever.

Interviewee: I just thought.... A curse word a first-grader would use when they came back with the diagnosis ."

Reporter: Female name , REPEAT male first name 's long-term partner of Number months, tells reporters they had only been looking for a change of scene. After years without a break, REPEAT male first name and REPEAT female name decided to apply for work leave, and, together with their pet Animal,

embark on a much-needed road trip. A few days in, however, things took a turn for the worst.

Interviewee: "We were ordering _____ Adjective you would use to describe a car _____ _____ Country _____ salads from _____ Restaurant chain _____ , and that was when his symptoms first started. _____ Verb ending in ING _____ , _____ Verb _____ ending in ING _____ . He couldn't stop himself. Yeah, it was strange, but we thought, you know, maybe he would sleep it off. So that night we just went to bed and both tried to ignore it."

Reporter: The next day, they found their troubles, far from over.

Interviewee: "Morning came, and I looked over, and we couldn't hold a conversation, the _____ REPEAT verb _____ ending in ING _____ was so bad. That was when we grabbed our _____ Plural objects _____ and rushed to hospital."

Reporter: It's hard to imagine just how difficult it must be to see a loved one in such a state. _____ REPEAT male _____ first name _____ was also suffering from excessive _____ Verb ending in ING _____ fits, as well as intrusive thoughts about _____ Plural objects _____ . Nurses struggled to diagnose these symptoms, but eventually, doctors declared he had contracted a non-lethal bacterial disease. When they asked whether he had been in contact with any wildlife the day before, the couple admitted they had been attacked by a swarm of _____ Plural cute animals _____ during their evening _____ Landscape - eg beach or mountain _____ walk. Doctors prescribed a course of antibiotics, and strongly advised him to return home immediately. The couple boarded a _____ Vehicle of transport _____ , and arrived home the next day.

Interviewee: "They estimated the recovery would take two weeks."

Reporter: While the medication, at first, seemed to be working, that relief was short-lived. Just a few days later, it was clear something was still very wrong. The original symptoms began returning, and after just one week,

REPEAT male first name was exhibiting an extensive, new symptom: an affinity towards Plural
something you would buy on eBay. More worried than ever, they paid yet another visit to hospital.

Interviewee: "I showed them which antibiotics he was taking, and..... they were all sort of at a loss."

Reporter: Nurses assured the couple that the latest symptom was simply a side-effect of the medication. They accused REPEAT female name for improper administration of the antibiotic, saying she had failed to correctly administer the daily dose via the Body part, which was why the symptoms had resurfaced. She insisted this was impossible, and the team of doctors were forced to inspect the patient more closely. What they found, was astounding. REPEAT male first name had contracted a well-documented pathogenic bacteria, known as spp. Two words that rhyme-us. While cases of human infection tend to be rare, the bacteria are ordinarily treatable with a regular course of antibiotics. However, on this occasion the bacteria proved unusually resistant to antibiotics, despite looking identical to the classic bacteria in every way. Pharmaceutical teams immediately began research into a new class of antibiotics, to treat REPEAT male first name's troubling condition.

Medical professional: "It's normal for bacteria to be slightly resistant to antibiotics. But what is not normal, is finding high levels of immunity in the wild. We used to only see that in densely-populated areas like hospitals and Plural place you would go for fun - eg parks or nightclubs ."

Reporter: Employees at the Centre for Infectious Research at the University of Brand of beer , are already investigating this emerging issue of antimicrobial and antibiotic resistance. Head of department, Dr.

Letter of the alphabet Item of clothing , who holds the world record for most Adjective
Plural nouns Past tense something you hate doing - eg vacuumed , claims we are now facing a
Number percent increase in the risk of infection by resistant diseases.

Medical professional: "No matter who or where you are in the world, this concerns us all. The antibiotics we feed to our livestock for the meat and dairy industries, and those which we consume ourselves, most of it ends up in the ocean. And what happened in the case of this gentleman is, these REPEAT cute animals were exposed to abnormally high levels of antibiotics, which caused them to be host to resistant bacterial strains. Of course, we know they spend most of their time hunting Adjective you would use to describe an eel
Plural marine organisms ."

Reporter: Bacteria have the ability to exchange genes with their environment, and each other. Thus resistance, once encouraged by antibiotics, is a self-feeding loop. As more and more antibiotics are entering our oceans, resistance

can quickly emerge in places as remote as _____ Somewhere you would teleport to in the event of an apocalypse _____. Even more

_____ Word you would use to describe a horror movie ending in ING _____, not only does this breed immunity in the wild, but it also increases the severity of any given disease.

Medical expert: "Times are changing. We are not living in the _____ Historic event _____ anymore. We need to take action, stop developing so many new antibiotics to combat the problem, and, instead, start using these medicines more responsibly. If medications like this were more strictly regulated, and patients more closely monitored, we wouldn't have this crisis on our _____ Plural body parts _____. "

Reporter: _____ REPEAT female name _____ says she is just grateful to have solved this mystery, and glad that life will soon be returning to normal.

Interviewee: "They've made new antibiotics for him now. He's still in hospital at the moment, but it's been a week, and his symptoms have subsided a lot. So he should hopefully be back to his _____ Adjective _____ old self in no time."

Reporter: At this moment we are pleased to report that _____ REPEAT male name _____ is in a stable condition and is expected to make a full recovery.

Anchor: _____ What you would say if you found out you got an A plus on your chemistry test _____

!!!!! Thanks _____ REPEAT _____

name of cat _____ for that report. Our thoughts and prayers are with them for a speedy recovery.
