St. John's Wort

ST. JOHN'S WORT.

This is a very beautiful shrub, and is a great ornament to our
Description
Common St. John's Wort shoots forth Noun Plural, hard, round Noun Plural, Number feet
nigh, spreading many branches from the sides up to the tops of them, with two small leaves set one against
another at every place, which are of a deep green colour, somewhat like the leaves of the
Name of Plant , but narrow, and full of small Noun Plural in every leaf ; at the tops of the
stalks and branches stand yellow of five leaves a-piece, with many yellow threads in the
middle, which being bruised do yield a reddish juice like blood; after which come small round heads, wherein is
contained small blackish seed smelling like <u>Noun</u> . The root is <u>Adjective</u> and <u>Adjective</u> ,
with divers strings and fibres at it, of a brownish colour, which abides in the ground many years,
Present ends in ING anew every Spring.
Place
This grows in and and noun Plural, as well those that are shady, as open to the sun.

Time

They Verb Base Form about Midsummer and July, and their Noun is ripe in the latter end of July
or August.
Government and virtues
It is under the celestial sign Leo, and the dominion of the Sun. It may be, if you meet a, he will
tell you, especially if he be a lawyer, that St. John verb Past Tense it over to him by a letter of attorney. It
a singular wound herb; boiled in and drank, it heals inward hurts or bruises; made into
ointment, it open obstructions, dissolves swellings, and closes up the lips of wounds. The decoction of the herb
and flowers, especially of the seed, being drank in wine, with the juice of knot-grass, helps all manner of
vomiting and spitting of blood, is good for those that are bitten or stung by any venomous, and
for those that cannot make water. Two drams of the seed of St. John's Wort made into powder, and drank in a
little broth, doth gently expel or congealed in the stomach. , ,
