How to pick up a chicken

This is how you pick up a bird breed.

First of all, you don't want to Verb Base Form it, so do not Verb Base Form toward it trying to catch it.

This will give the same bird breed unneeded Noun from humans. Instead, Adjective hold

your part of the body out to the same bird breed. Now sometimes this doesn't work, so I'd recommend

bringing treats to put in the palm of your hand.

The next step is to ask the feathered creature for permission. The way you'd ask for permission is just by simply

saying "Random phrase Random phrase Random phrase". The same bird breed will humbly

accept the offer because you gave it treats.

After you have gotten its approval, you may gently pick it up with the part of the body still out after

offering it treats. You are now holding a same bird breed. (New achievement unlocked)
