Lawn Mowers

Two main styles of _____ are used in lawn mowers. Lawn mowers _____ a single _____ that _____ about a single vertical axis are known as _____, while those employing a _____ bar and multiple _____ assembly that rotates about a single horizontal axis are known as _____ or _____ mowers (although in some versions, the _____ bar is the only blade, and the _____ assembly consists of flat metal _____ which force the blades of _____ against the sharp cutting _____).

There are several types of mowers, each suited to a particular _____ and _____. The _____ types, _____ push mowers, are suitable for _____ lawns and gardens. _____ or piston engine-powered push-mowers are used for larger _____ lawns (although there is some overlap). _____ mowers, which sometimes resemble small _____, are larger than push mowers and are suitable for large _____. However, commercial _____ lawn mowers (such as zero-turn mowers) can be "stand-on" types and often bear little resemblance to residential _____ tractors, being designed to _____ large areas at high speed in the _____ time possible. The largest multi-gang (multi-blade) _____ are mounted on _____ and are designed for large expanses of _____ such as golf courses and _____, although they are ill-suited

for Adjective terrain.
