# Weather Forecast

Good evening! This is meteorologist \_\_\_\_\_ (Proper Noun) (funny name) reporting live from \_\_\_\_\_ (Proper Noun) (place).

A huge \_\_\_\_\_ (Adjective) (adjective) \_\_\_\_\_ (Adjective) Front (warm/cold) is moving across the region. As the front approaches, a \_\_\_\_\_ (Adjective) (adjective) low-pressure system is developing over \_\_\_\_\_ (Noun) (place).

The low pressure is causing air to \_\_\_\_\_ (Verb Base Form) (verb), creating strong convection currents. Because of this, we expect \_\_\_\_\_ (weather event) and possibly \_\_\_\_\_ (another weather event).

Meanwhile, a \_\_\_\_\_ (Adjective) (adjective) high-pressure system is moving in from the \_\_\_\_\_ (direction). High pressure usually brings \_\_\_\_\_ (Adjective) (adjective) skies and \_\_\_\_\_ (weather condition).

Temperatures will rise to \_\_\_\_\_ (number) degrees before dropping to \_\_\_\_\_ (number) degrees when the front passes.

Winds from the \_\_\_\_\_ (direction) may reach speeds of \_\_\_\_\_ (number) miles per

hour. Residents should secure any \_\_\_\_\_ (plural noun) that might blow away.

There is also a \_\_\_\_\_% chance of \_\_\_\_\_ (weather event) this evening. If you hear thunder, stay away from \_\_\_\_\_ (plural noun) and seek shelter inside a \_\_\_\_\_ (building).

Looking ahead, a \_\_\_\_\_ front may collide with a \_\_\_\_\_ air mass, bringing \_\_\_\_\_ (weather event) to the area.

This has been your weather forecast from \_\_\_\_\_ (made-up weather station). Stay safe, stay dry, and watch out for flying \_\_\_\_\_ (plural noun)!

The End!
