# elements

An element is a pure           Noun           that cannot be           Verb           down into other substances by physical or chemical means. Elements are           Verb           of only one type of atom. There are over           Number           known elements, 92 of which occur naturally.           Animal           have collected a large amount of information about the           Noun           such as the number of protons and electrons each element has and the atomic mass of each element. Also, each           Animal           has a           Adjective           name and symbol. All of these           Noun           are           Verb           in an organized table called the periodic table of the elements.
