The Structure Of Atoms

_____ Noun is so small that billions of them could fit on the head of a pin. _____ First name are made up of smaller _____ Animal called neutrons, protons and electrons as illustrated in Figure 1. Neutrons and protons are located at the center of the atom, called the nucleus. Protons are positively charged particles and neutrons are particles that have no charge. Electrons are negatively charged particles that are located _____ Location _____ Event the nucleus. Electrons constantly move around the atom's nucleus in energy levels. The basic structure of an atom is the result of the attraction between protons and electrons. Atoms contain an equal number of protons and electrons, so the overall charge of the atom is _____ First name.
