The structure of an atom

An _____ is so small that _____ of them could fit on the head of a pin. Yet, _____ are made up of even smaller particles called _____ protons, and electrons, as _____ in figure 1.

_____ and _____ are located at the center of the atom, which is called the _____.

Protons are _____ charged particles and neutrons are particles that have no charge. Electrons are _____ charged particles that are located outside the _____. _____ constantly move _____ an atom's nucleus in energy levels. The basic structure of an atom is the result of the _____ between _____ and _____. _____ contain an equal number of protons and electrons, so the overall charge of an _____ is _____.
